Product Data Sheet

General Description
PRODUCT CODE: P9SA49
PRODUCT NAME: CHROME
CHEMISTRY: POLYESTER
SURFACE FINISH: SMOOTH METALLIC

Application Recommendation
Surface preparation: All oil and grease, scale and rust, must be removed.
Pretreatment Requirements: A five stage pretreatment according to ASTM B449 is highly recommended. Anodizing according to AAMA 2603-02 are acceptable methods of optimum adhesion performance and excellent corrosion protection.
Cure Schedule 10 min. at 400 Deg. F or 15 min. at 375 Deg. F, Metal Temperature.
Film thickness: 2-4 mils.
Weatherability: Good for outdoor applications.
Designed for electrostatic application. For use in wide variety of general metal applications.
Shelf life is expected to be at least one year from date of shipment when stored in dry conditions at less than 80 Deg. F.(27 Deg. C.)
This powder coating do not contain the 10 restricted substances, as defined in the European directive 2015/863/EU (RoHS 3 restriction of Hazardous Substances) 2), Article (4)2, Annex II, to this product, and have determined that any impurities disclosed to us by our suppliers are in amounts less than the maximum concentration values tolerated by weight in homogeneous materials for the restricted hazardous substances under the RoHS 3 CE- marking directive and REAC Restricted Chemical list, Cadmium, Chromium VI, Lead, Mercury, Cadmium, Polybromobiphenyls, Polybrominatedbiphenyls(PBB) under the RoHS 3 compliance effect July, 2019.
Do not contain Chemicals listed in California January 03, Proposition 65 list.

Typical Performance Characteristics
Specific Gravity Calculated 1.43
Coverage Calculated 135 square foot/lb./mil
Particle Size ASTM D3451 0-10% over 200 Mesh
Alpine Jet Sieve 40-45% over 400 Mesh
Gloss 60 Degree ASTM D 522 95+/-.5 UNITS
Impact Resistance ASTM D 2794 160 in.lbs.Direct/160 in.lbs. Reverse
Flexibility ASTM D 522 Pass 1/8” Mandrel
Pencil Hardness ASTM D 3363 2H
Adhesion ASTM D 3359 5B- Method B
Salt Spray Resistance ASTM B 117 1000 hr. (ASTM D165 Creepage Min.7)
(=ASTM D714 Blister Min. 8)
Humidity Resistance ASTM D 2247 1000 hr. (ASTM D714 Blister Min.8)
Weathering: South Florida Exposure 45 degree angle facing South
Color Retention 3 years (ASTM D2244) < 5 DE “CIELAB” (ASTM D2244)
Chalk Retention 3 years (ASTM D4214) Minimum 8 rating (ASTM D659)
Gloss Retention 3 years (AAMA 2604) > 30% retention (ASTM D523)
Erosion retention 3 years (ASTM D662) <10% Loss

* Testing performed on Bonderite B1000 panels.

Important: Warranty and Disclaimer- The information contained herein is to the best of our knowledge, true and accurate. All recommendations or suggestion for use are made without guarantee. Since the conditions of use are beyond our control, The performance characteristics of these products vary according to product application, operation conditions, materials applied to. Since these factors can affect results, we recommended that you perform your own test to determine to your satisfaction whether the product is acceptable and is suitable for your particular purpose under your own operation conditions prior to using any product in full scale production. Seller warrants the product to be free from defects in materials and workmanship. Such warranty is exclusive and is in lieu of any other warranty. Nortek Corporation disclaims any liability incurred in connection with the use of our products and information contained herein. No representative of ours has authority to waive or change this provision, which applies to all sales of these products.
